

## Are you interested in training factories to improve their performance?

If so, we would like to hear from you.

We are currently recruiting ambitious trainers and consultants that will be trained to deliver the Sustaining Competitive and Responsible Enterprises (SCORE) programme. SCORE is an ILO global training and consulting programme for factories that teaches cutting-edge practices to:

- **Increase productivity**
- **Improve quality**
- **Reduce costs**
- **Improve communication and cooperation**
- **Increase workplace safety**
- **Improve food safety<sup>1</sup>**

More than 1,000 enterprises in 15 countries worldwide have been trained in SCORE. A consultant from the globally renowned 'Kaizen™ Institute' has re-designed the training to meet the needs of small and medium sized factories in Myanmar.

## Benefits of being a SCORE Trainer

- **Receive intensive training for over 12 months from international experts from the Kaizen™ Institute**
- **Learn tools and processes that will enable you to make major improvements to factories**
- **Receive international certification as a SCORE Trainer**
- **Receive support with selling SCORE training**

<sup>1</sup> When implemented in food factories, SCORE includes a specific module on food safety.

## Who can become a SCORE trainer?

We are looking for trainers and consultants who have the motivation and the skills to bring about big changes in factories and want to make a business out of providing training and consulting services. To apply to become a SCORE trainer, you must meet the following criteria:

### Essential criteria

- Capacity to sell SCORE training to enterprises
- Effective at training adults. Including strong presentation and facilitation skills
- Degree in a relevant topic. Including, but not limited to, engineering, human resource management, business administration, or food science
- Knowledge and significant experience of management or consulting in at least two of the following areas:
  - Production and productivity improvement
  - Quality
  - Human resources
  - Occupational Safety and Health
  - Food safety
- Capacity to persuade staff at all levels to make changes and to communicate technical information in a simple and clear way
- High level of analytic capacity. Including capacity to collect, analyse and interpret data, and to identify key problems within factories
- Problem solving skills and systematic approach to problem-solving
- High level of competence in word and excel

### Desirable criteria

- High level management experience in factories and experience of managing change in organisations
- Capacity to communicate effectively in English (written and spoken)
