The second edition of this acclaimed volume has been thoroughly revised and updated to provide an authoritative account on how active labour market policies (ALMPs) can help make globalization work better in the interest of workers around the world. Offering an expanded and current overview of the nature of ALMPs, this new edition gives readers a fresh look at the pitfalls and challenges countries face when evaluating these programmes.

A new chapter on financing reflects today’s growing relevance of ALMPs and provides an overall policy framework for designing durable, yet adaptable ALMPs. While putting forth some powerful arguments in favour of these programmes, the book also emphasizes that they should not be used as a “quick fix” solution. For this reason, it recommends new ways of financing these policies over the long term and examines the importance of social dialogue as a vital policy tool for establishing more permanent frameworks that allow for labour market flexibility while maintaining security in a globalized world.

**ABOUT THE AUTHORS**

Peter Auer is chief of the Employment Analysis and Research Unit in the Employment Strategy Department of the ILO, Geneva.

Ümit Efendioğlu was formerly research economist at the Employment Analysis and Research Unit and is now with the Cabinet of the Director-General, ILO, Geneva.
